[illegible]

[illegible],

[illegible] do not
be returned with corrections. What
I called Andrewsiella planca is M.
fruticum as I now see by the [illegible]
accinium ovalifolium Smith.
have no specimens of and therefore
said on & the smaller specimens of
Mrs. Austin's No. 84 & called her me
which is probably var. V. caespitosum.
I do not see all I have of
her No. 62 as you mark the name
of Menziesia Drummondi as doubtful
Here I should be glad to have back
as I have no other specimens of this
species of Menziesia.
Perhaps I had better send [illegible]

[illegible] can see [illegible] the Comm[illegible]. He sent me a pretty little specimen of the new plant. As to the matter of the plate he proposes I must leave that to you. If it be at all advisable to get one up (which could be done at my expense were the plant worth it,) would it not be as well to have a Botanical also in the original plate of which is imperfect and I believe difficult to procure also?

But don't [illegible] out either Asa's or my suggestion "unless" the plant is sufficiently interesting to warrant it as an aid to the science.

Please say to Watson (I forgot it when I last wrote to him) that I acquiesce entirely in his view about the Viola.

Yr truly

[illegible]

I have not a [illegible] and Mr. Bull [illegible] Prof. Peirce. Can you [illegible] sent; - how expensive? And how to [illegible] any [illegible] on a complete matter I should like to know about if convenient. No. 139 Lemmon 1874 is labelled Vaccinium uliginosum - but as Prof. Cal. does not give that as [illegible] as yet) to the Cal. Flora, and it appears to agree pretty well with the description, I suppose it the V. vacillans. Very; and what is the name of this [illegible] closed your Coll. this [illegible]

Yours
